# CULTIVEZ VOTRE SENS CRÉATIF

🪴 « Ces pots en terre cuite, simples mais foisonnants, sont la dernière nouveauté de notre collection botanique LEGO® : trois groupes de plantes emblématiques et exotiques, miniaturisées pour faire entrer le charme LEGO typique dans votre maison. Des plantes d'intérieur sensibles à l'humidité aux plantes succulentes peuplant les déserts, en passant par les plantes carnivores, ce savant assortiment de plantes peut être utilisé regroupé ou en petites séries de trois, et conservera sa couleur et son allure tout au long de l'année. Avec des instructions qui vous permettent de participer facilement avec des amis ou des proches, nous espérons que vous profiterez ensemble de votre jardin d'hiver ! »

## PLANTES TROPICALES

▣ Les forêts tropicales humides ne couvrent qu'environ 6 % de la surface de la terre, mais elles abritent près des deux tiers de toutes les espèces végétales, notamment des plantes aux propriétés médicinales utilisées dans le traitement d'un grand nombre de maladies. Les conditions chaudes et humides permettent à des milliers de fleurs, d'arbres et de buissons éclatants et luxuriants de prospérer et de servir d'abri et de nourriture aux animaux comme aux humains.

*(Oxalis triangularis)*

### **FAUX TRÈFLE**

Plante vivace originaire d'Argentine, de Bolivie, du Brésil, du Paraguay et du Pérou.

*(Crassula ovata)*

### **ARBRE DE JADE**

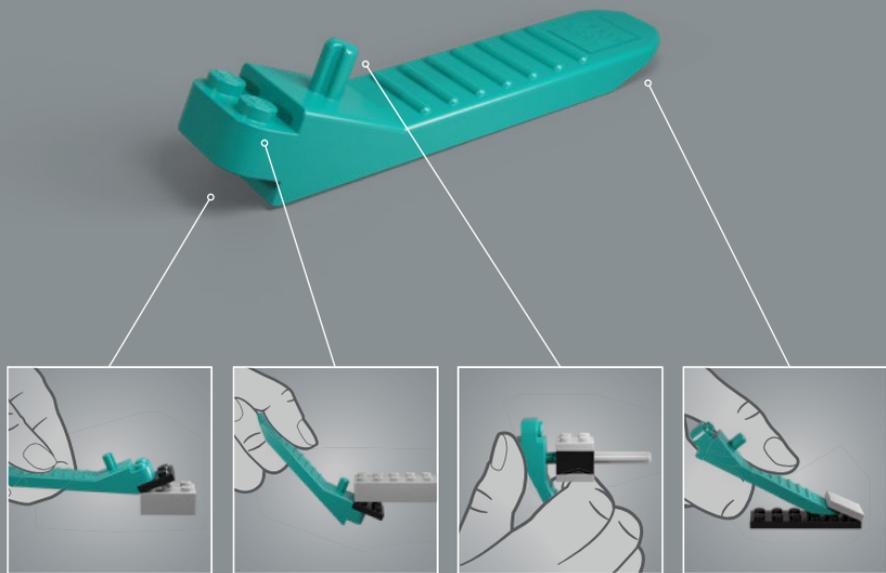

Une grande succulente originaire d'Afrique du Sud et du Mozambique.

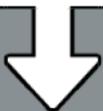

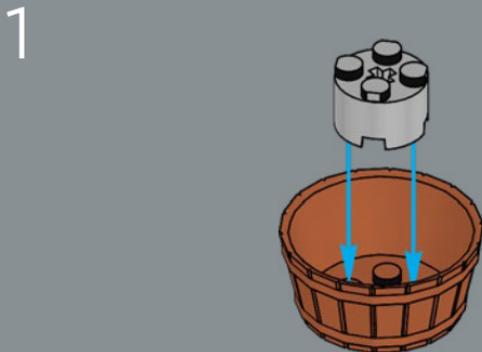

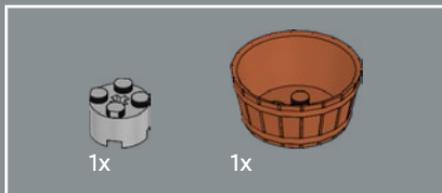

*(Anthurium andraeanum)*

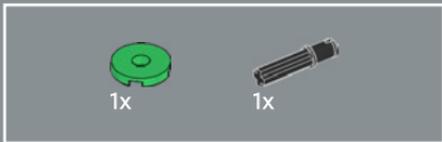

### **ANTHURIUM**

Plante florifère originaire de Colombie et d'Équateur.

Au premier coup d'œil, on pourrait confondre l'*Oxalis triangularis* avec tout un groupe de papillons, alors quoi de mieux que d'utiliser le papillon LEGO® dans une toute nouvelle couleur pour capturer l'aspect emblématique de cette plante.

Les fleurs d'anthurium sont vulnérables aux parasites tels que les pucerons et les tétranyques. Une coccinelle gourmande dans le pot, c'est un bon moyen de garder la plante en bonne santé.

Vous connaissez peut-être aussi l'Anthurium sous l'un de ses nombreux autres noms, comme flamant rose ou palette de peintre. On adore l'abondance d'allitérations !
